Re : P.O.: # 4069, the replacement Shackle pendulum x 2,000 pcs, Galvanized.

Dear Ms. Charvet,

1) Re our tested for Shackle Pendulum which we open mould and we made it:

A) We tested the Strength, it is over 1,500 Kgs = 3,300 lbs and never break.

B) We tested the twisted, the maximum twisted we can tested here is only 500 Kgs = 1,100 lbs only,

This Shackle Pendulum never break, so it seems the twisted strength can be over 500 Kgs at least and more.

C) It seems the material and the all strength for this Shackle Pendulum quality is good.

Please advise me if you still have any question, thanks.

Best regards

Ken Hsu
